A crash refers to a sudden dramatic loss in value of the market, which can last for hours or years? Generally, a market crash is defined as a large number of investors on the stock market. The price of the stock falls significantly, often by more than 10% in a short period. This can be caused by a variety of factors, including economic downturns, changes in interest rates, or a loss of confidence in the market.

What is a crash? A crash is a sudden and significant drop in the price of a stock or other financial instrument. It is often characterized by a sharp decline in the price of the asset, followed by a period of volatility and uncertainty. Crashes can be caused by a variety of factors, including economic downturns, changes in interest rates, or a loss of confidence in the market.
